About Us

St. Martin Cabinetry is a custom manufacturer and distributor of contemporary, design-focused framed-inset and frameless cabinetry based in Cressona, PA The curated products we offer showcase our focus on exceptional design as they utilize natural and architectural elements to create cohesive and contemporary spaces.

Exacting quality, and our pledge to adhere to it, is the cornerstone of our brand. Our hand-crafted products are engineered to create a feeling of tranquility and luxury. All of our natural rift white oak doors are an excellent example as each piece manufactured is meticulously wire-brushed to create texture, interest and appeal.

As a company, you will find that we are service and performance driven. From the start of your project until the time that it is completed, we strive to offer exceptional customer service, functional and coherent pricing and design systems, strict quality standards and on-time deliveries. This is our pledge to you and when we are successful, together we enhance people’s lives and the spaces they call home.

Manufacturing can take a toll on the environment which is why our products are tailor-made with sustainability in mind. With each kitchen we sell, we give back so our forests are replenished and our valleys are verdant and lush. By reducing our carbon footprint where possible and by extracting efficiencies, we are able to reduce the environmental costs our products create.

Product Plan

Our product plan was designed with simplicity in mind. It is split into two categories; painted and stained finishes. They are organized lightest to darkest in descending order and also segregated by wood species for stained finishes. All St. Martin products, regardless of the price group and door/color selection, feature the same incredible nine-ply plywood cabinet construction and box specifications.

Painted Products:

Our painted products come on an array of door styles and have been specifically developed to reflect market trends and designer needs. They are durable, vibrant and epitomize the craftsmanship inherent to our brand. All painted finishes including custom colors, feature unmatched finish quality and affordable price-points making it easy to create value at the point of sale.

Highlights of Painted Products:

- New and exciting modern colors are carefully arranged in our product guide by color group. Within the groups, brighter tones are organized in descending order making it easy to see the entire color palette.
- Painted finishes feature a faster lead time for applicable door styles. Please inquire with our customer service department to see if your order qualifies.
- All modifications and SKUs found within this spec book are available in addition to custom doors and panels.
- Custom paint colors are available using any standard colors from Benjamin Moore, Sherwin Williams and Farrow & Ball.
- Rift Cut Oak wood species can now be painted in any standard finish or custom paint color.

Stained Products:

Our Stained Products are offered on a plethora of North American Hardwood species like Rift Cut White Oak, Natural Walnut Maple and Cherry and come in a variety of heirloom and modern finishes. All stained products are carefully hand-crafted and undergo a 16-step process with the finest attention to detail.

Highlights of Stained Products:

- Luxurious finishes on North American Hardwood species such as Maple, Walnut, Rift Cut White Oak and Cherry. Within the wood species groups, lighter finishes give way to warmer and then darker finishes in descending order.
- All hardwoods and veneers used for our stained products are hand-selected for grain, uniformity and color.
- All White Oak Doors and Drawer Fronts, regardless of color, are meticulously wire-brushed to add texture, warmth and tranquility.
- Flat panel door styles feature a vertical grain match automatically at no extra charge for all base cabinets.

Product Guide for Kitchens and Vanities

ORDER PROCESS

Order Process

- Upon receipt of your order, our customer service team will review and send back an order confirmation within 2-3 business days. Please note that if your order contains items that require a custom drawing, you must approve the custom item(s) before a formal acknowledgment can be sent.
- Please take time to thoroughly check your confirmation to ensure that the color, door style, items, delivery information, and projected ship week all accurate.
- Should your order require revisions, please email them to our customer service team who will subsequently send back a revised confirmation for final approval. Please be aware that any delays during the order process may affect the projected ship week.
- To finalize and immediately place your order into production, please sign the bottom of the order confirmation and send it back to our customer service department. Confirmations are also accepted via email. By confirming the order, you take full responsibility for any and all errors on the order form.
- Due to the custom nature of our cabinetry, we do not accept cancellations or modifications once an order has been confirmed with customer service.
- One to three weeks prior to projected ship week found on the finalized order confirmation, our shipping department will contact you to schedule delivery.

Quotes

Please direct all quotation requests to our Design and Engineering Department. Clearly indicate that your submission is a quote request to ensure accurate processing. The Orders Department is dedicated exclusively to live orders and should not be used for customer quotations. By following this procedure, we can provide efficient and precise service for both quotes and orders.

If you have any questions or need help placing an order, please contact our Customer Service Team directly and we will be happy to assist you.

Product Policies

Delivery Policies and Procedures

Lead Time Information for all Finishes

- Your lead time does not begin until your order is confirmed with customer service. If you have terms that require payment or deposit, we cannot place your order until your payment obligation has been met. A delay in payment can delay your projected ship week. Please check our weekly update e-blast for details or inquire with customer service for our current lead-time information. St. Martin Inset Cabinetry is approximately 8-12 weeks for all delivery zones.

Replacements & Add-ons

- Replacement and add-on items that do not require a truck delivery can take 3-4 weeks from the time that an order is confirmed, some exclusions apply.
- Some larger replacement and add-on items may take up to 12 weeks to ship. Please inquire with Customer Service for more details.

Delivery & Storage Fees

- We offer seamless and stress-free deliveries for most commercial and residential addresses within the Continental United States. Please refer to the shipping matrix for accurate fees associated with your delivery zone.
- Deliveries for shipping zones 1-3 are typically made by St. Martin Cabinetry company vehicles; however St. Martin Cabinetry reserves the right to use third party delivery services due to distance, difficulty of the run or lack of trucking capacity. Should St. Martin Cabinetry choose to use a third-party service, you will be notified by email and given all applicable information. You will need to schedule and confirm your delivery with the third-party service directly. Additional fees may apply based on specific job-site conditions or requests made with the third-party.
- If job-site delivery is required, please specify this on the order form. For Zones 1-3, the delivery will be made by a driver and helper to the first available location which is normally the garage or first floor. Dealer is responsible for ensuring that all delivery areas are accessible with our equipment and that all cabinets will be deliverable inside. Please check and confirm that large cabinets, range hoods and pantry cabinets will fit through doorways. More difficult deliveries, such as ones to city apartments or construction sites that are not easily accessible, may incur an additional delivery charge and may be sent to a third-party shipper. The shipping department should be notified when there are special circumstances.

- Deliveries to zones 4-6 will be transported LTL or Common Carrier at the sole discretion of Moss & Grain and an authorized person must be present on site to accept the delivery. At times, last mile delivery may not be available. All LTL deliveries are curbside only. All deliveries that require a lift-gate will incur a fee of \$200. Oversize pallets may also be subject to additional fees and may result in lift-gate delivery being unavailable. Please note that the final cost of the delivery may change from what is on the sales order due to changes in the address, type of delivery or delivery requirements. Deliveries for zones 7 through 12, we utilize a dedicated furniture carrier offering white glove services. This includes deliveries to either a commercial locations or residential addresses, placement inside the home at the first available location.
- Orders that are not able to ship for two weeks or more beyond the confirmed ship week will incur a storage fee of \$40.00 per business day starting on the first day of the third week. Once an order is available to ship after being delayed, it will need to be worked into the shipping schedule based on availability. This may result in additional fees. It is best to make sure the projected lead time on your order coincides with the project's schedule. We will not store orders more than 2 months, but should the need arise for additional time, please contact the shipping department. Please be aware that St. Martin Cabinetry reserves the right to cancel any orders stored after two months and keep any monies collected or charge a restocking fee, whichever is applicable. If an order is transported to a third-party warehouse or distribution center, additional storage fees may be incurred. St. Martin Cabinetry reserves the right to deny damage claims for orders that have been stored for over 15 days. As a manufacturing facility, it is a risk the dealer accepts when asking us to store their orders.
- Should we be unable to deliver any order due to dealer fault, the order will be returned and a redelivery fee of \$250 will apply. Rescheduling is based on trucking availability and storage charges begin on the day of intended delivery. St. Martin Cabinetry reserves the right to deny damage claims for orders that have to be redelivered.
- As a manufacturing facility, it is a risk the dealer accepts when asking us to store their orders. Dealer assumes the risk of loss or damage for orders in storage for over 2 months from date of confirmation ship week. Multiple deliveries will equate to multiple charges.
- Parts items may be shipped via common carrier and a damage disclaimer may need to be signed. Additional charges may apply.

- Zone 12 - Washington /WA

Includes all Counties in Washington

3 Delivery Process

- One to three weeks prior to the projected ship week displayed on your finalized order confirmation, we will send an email to the email address on record to schedule your delivery based on the shipping address found on the order confirmation. Please note that if the delivery address is changed at any time after confirmation of the order with customer service but before confirmation of the delivery date and time with the shipping department, an additional fee of \$100 may apply. The delivery date and time must be confirmed by email to maintain the delivery date and time provided. Once a delivery has been confirmed, changes or cancellations will result in an automatic fee of \$100 and storage on the products will begin immediately. Changes to the address after confirmation of a delivery will result in a \$150 fee and will be accommodated at the sole discretion of the shipping manager. If a delivery is being handled by a third-party shipper, we will let you know when it is scheduled to arrive at their warehouse so you can make the necessary arrangements for final delivery.
- On the day of delivery, the driver will call one hour before arrival to let you know their estimated time of arrival. Please make sure you have an authorized person on site to accept the delivery and sign the delivery note. Any delays, through no fault of St. Martin Cabinetry, or the inability to have an authorized person on the site may result in additional charges and a redelivery fee.
- When the order arrives at your dock or job site, make note of any visible damage on the driver's delivery form in addition to contacting customer service.

Concealed Damages & Missing Product

- The policy of St. Martin Cabinetry requires the customer to check the enclosed packing list for accuracy at the time of delivery in addition to any damages that may have occurred. St. Martin Cabinetry will not take the responsibility for any item missing from your order unless we are notified at the time of delivery. Once the order has been delivered, or picked up, and signed for, the order becomes the responsibility of the customer. We understand that no freight carrier is perfect and that items may get lost or damaged during shipping, so it is imperative that you check your order at the time of delivery.
- Immediately report any missing or damaged items to the driver at receipt of the shipment in addition to our customer service team. Claims for damages or missing items must be accompanied by pictures and a fully documented claim form. All claims for damage, shipping and otherwise, must be made prior to installation of cabinets and decorative hardware. St. Martin Cabinetry will not accept ANY claims for concealed shipping damages 15 days after delivery or after installation. All claims for missing items must be made at the point of delivery and noted on paperwork at time of delivery.

3 Return & Cancellation Policy

- All products sold must be signed for by the purchaser. In signing this, you as the purchaser take responsibility for payment of the product.
- All of our products are built to order and due to the custom nature of our business we do not accept returns, changes or cancellations under any circumstances once an order has been signed or confirmed via email by the dealer.
- St. Martin Cabinetry does not inventory pre-built cabinets; please make sure that confirmed orders are complete and accurate.

Processing a Damage Claim

- In the event you have damaged items, please use the following process so any issues can be resolved quickly and efficiently. Our process has been designed to provide insight into problems so they can be addressed by either preventative or corrective actions to eliminate the potential for recurrence.
- Immediately take pictures of the damaged part and packaging and email them to our customer service department: sales@stmartincabinetry.com. If the damage is visible prior to unloading, take pictures of the damage while it is still in the truck. Your email communication should include the order number, door style, finish and the items needed for replacement along with photos of the damage. This information is crucial for processing your warranty claim and for the development of future preventative measures. Without photos your warranty will not be reviewed for processing.
- Do not use, destroy or discard the damaged product. In the event that St. Martin Cabinetry or the freight carrier wish to retrieve the damaged product, you will be contacted within one week from the date that the damage was first reported.
- If we are not supplied with photos or the item is not made readily available for pick-up, you will be charged for the replacement.
- We do not accept any claims for hidden or concealed damages after 15 days from the date of delivery. We also do not accept any claims for hidden or concealed damages once our products have been installed.

St. Martin Inset Cabinetry

Limited Lifetime Warranty

St. Martin Cabinetry warrants to the original purchaser that all cabinets will be free from defects in material and workmanship under normal residential use. This limited warranty is subject to certain limitations and exclusions outlined below. This warranty applies to the original residential cabinet purchaser only and is nontransferable. This limited warranty does not apply to any electrical components of any type whatsoever commercial properties, rental properties and any other non-residential properties and is applicable only, or as long as the original purchaser owns their home, within the United States and Canada. Due to the custom nature of its products and their unknown intended applications, St. Martin makes no warranty, express or implied, of merchantability or fitness for a particular purpose.

Exclusions - As with all natural materials, wood is affected by environmental factors such as natural and artificial lighting, smoke and age. Darkening or mellowing can be expected and is a natural process for wood as it ages. Each wood species also exhibits its own distinctive grain patterns and characteristics which adds to its natural beauty. These variations in color, grain and other naturally occurring characteristics are not considered imperfections or defects. This warranty does not cover natural aging and darkening of the wood color nor does it apply to the inherent growth characteristics of wood. All electrical components, including but not limited to ventilation units and LED lighting are sold as is with no warranty whatsoever, and with no representation of merchantability or fitness for a particular purpose. Due to natural aging and oxidation of real wood products, St. Martin Cabinetry cannot guarantee an exact color match between existing aged wood products and new replacements. We reserve the right to provide warranty replacements and add on orders from existing inventory that offer the closest possible color match; however, an exact match is not guaranteed.

Finish Variation - All wood varies in color from piece to piece due to natural variation in tone and grain patterns. While St. Martin Cabinetry takes extra steps in selecting each piece of wood to enhance the natural beauty of our products, we cannot guarantee that every component will exactly match other components. The resultant natural variation in finish is not considered a defect and is not covered by our limited warranty.

Pitch Pockets and Mineral Streaks - In certain species of wood, pitch pockets and mineral streaks are prevalent. This is particularly true of the beautiful Cherry lumber used in producing some St. Martin Cabinetry products. These naturally occurring features of our North American grown Cherry and other lumbers are not considered to be defects and are not covered by our limited warranty.

Hairline Cracks - Environmental factors influence the performance of wood products. All wood absorbs and releases moisture due to its cellular structure. In periods of high humidity, wood will “grow”, and during dry periods, wood will “shrink”. Over a period of time, the absorption and release of moisture may cause visible hairline cracks typically in joinery of wood components. These minor cracks are not considered defects and are not covered by our limited warranty.

Hairline cracks at door and face frame joints are a natural characteristics of painted inset cabinetry and are expressly excluded from warranty coverage.

Warping - Warping occurs in wood when the absorption and release of moisture creates “stress” in the wood. In many instances, this condition will resolve itself after the cabinetry in your home goes through a heating and cooling cycle. Warping of components is allowed up to one quarter inch (1/4”) and is not considered a defect covered by this limited warranty.

Fingerprints - Fingerprints can occur on wood products, especially darker painted finishes, due to oil and residue left on the human hand. Fingerprints are normal and are sometimes found on products that receive heavy usage or were not installed with hardware on doors, drawers or other accessories. Fingerprints on our finishes and products are expected to occur with normal usage and are not considered a defect covered by this limited warranty.

Household Cleaners - Certain household cleaners and other substances, whether acidic, basic or neutral, may affect the color and integrity of the product's finish over time. Any such effects on the color and/or integrity of the finish are not covered by this Limited Warranty. Please contact your authorized dealer for care and cleaning instructions.

3 Limitations of Liability

- This warranty applies only to normal indoor consumer use. All electrical components of any type whatsoever and product used for commercial or outdoor use are excluded. Not covered under this warranty are cabinets showing normal wear and tear; dings, dents, finish wear, and scratches on installed cabinets, cabinets that were not stored or installed properly, improperly assembled or disassembled, intentionally damaged, misused, or exposed to elements; cabinets that have defects due to excessive moisture, accidents or negligence; and cabinets that have been changed or modified in any way.
- Installation of St. Martin Cabinetry products constitutes the customer's acceptance of the goods as delivered. Any claims regarding defects or non-conformities must be reported prior to installation.
- This warranty is expressly limited to the repair or replacement of the defective component parts at our discretion. Our liability is expressly limited to the cost of material for the repair or replacement of defective goods. We may elect to repair or replace the product with a product of equal or lesser value and complementary style if the original style is no longer available. Due to the aging process of natural wood, St. Martin Cabinetry can't guarantee an exact match between the finish of the existing product and the replacement product.

Hairline Cracks - Environmental factors influence the performance of wood products. All wood absorbs and releases moisture due to its cellular structure. In periods of high humidity, wood will "grow", and during dry periods, wood will "shrink". Over a period of time, the absorption and release of moisture may cause visible hairline cracks typically in joinery of wood components. These minor cracks are not considered defects and are not covered by our limited warranty.

- In no event is St. Martin Cabinetry liable for incidental, indirect, or consequential damages resulting from the use of our cabinets. This warranty does not cover electrical components, the cost of assembly, installation, removal, subsequent damage or transportation of the defective product or replacement.
- When a claim for warping, joint separation, wood growth or color variation for a newly installed kitchens, replacement orders or for additions to exisiting cabinetry is submitted, St. Martin Cabinetry may, at its sole option and after inspection, defer action for 12 months to allow the product to age, oxidize, and acclimate to the installed environment, In the case of stained wood product new product replacements and add on pieces will need a minimum of 12 months to naturally age and catch up to previously installed natural wood pieces.
- Some states do not allow limitations on how long an implied warranty may last or the exclusion and or limitations of incidentals and/or consequential damages. Therefore the above limitations may not apply.

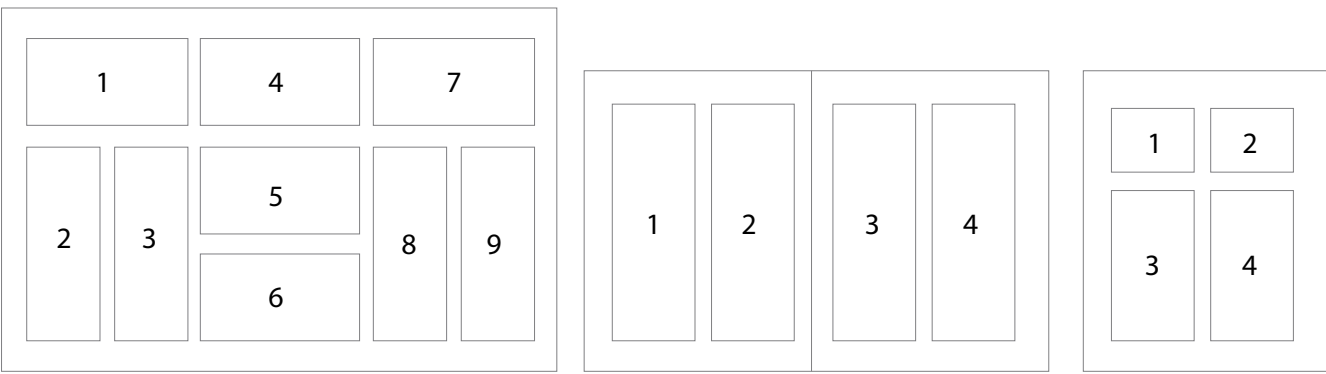

- This warranty shows specific rights that may vary from state to state. Any claims made under this warranty must be presented in writing with a dated sales invoice accompanied by photographs of defective material.
- The remedies put forth above are your sole and exclusive remedies and outline St. Martin Cabinetry's entire liability for any breach of this limited warranty.
- No other warranties apply. This limited warranty is effective for product manufactured by Marram on or after April 1, 2024.

Making a Warranty Claim

Please contact the dealer from whom you purchased the product for warranty assistance. If you are unable to contact your authorized dealer, you may contact our customer care team. Please include your name, address, phone number and original proof of purchase as well as photographs of the product in question to customer service.

St. Martin America: 87 Schuylkill StreetCressona, PA 17929
Email : sales@stmartincabinetry.com

Door configurations

It is important that when alerting our customer care team of a replacement or add on part needed that we are made aware of exactly which door or drawer front is being requested. Please use the shown guide as a reference when making these claims. St Martin Inset Cabinetry is highly custom and no two pieces are alike. All items are built and milled to order. It is imperative that our team is provided with the most accurate information possible in order to guarantee the correct items are ordered for all parts orders, warranty and otherwise.

Product Specifications

Wood Characteristics

Wood cabinetry is as unique as a fingerprint; no two pieces are the same. Each piece of lumber and each piece of veneer is truly one of a kind. Soil and climactic conditions affect growth characteristics, presence of mineral streaks, gum spots and knots, and creates striking coloring and grain patterns. These naturally occurring variations give wood its distinct character and exceptional beauty.

St. Martin Cabinetry takes great care in selecting the finest quality kiln-dried North American Hardwoods for your kitchen. Lumber is dried to a 6-8% moisture content to ensure that your cabinetry remains stable in most environments. However, wood, by its very nature, will expand during humid months and contract during the dry season, so humidity levels in your home should be carefully monitored. A 40-50% humidity level should be maintained during installation and throughout the year to maintain the proper moisture content of your cabinets. Extremes (below 20% or above 80%) are likely to cause problems with the natural wood.

The best quality hardwoods have certain characteristics that can't be hidden by the finishing process. These natural variations occur due to the fact that the wood is a natural product, affected by weather, climate, birds, insects, soil makeup, number of sunshine hours per year and natural growth patterns for each individual tree. These characteristics are part of the natural beauty, charm and appeal of real wood and should be carefully considered.

AMERICAN CHERRY

American Cherry has a rich color and smooth, flowing grain patterns. Color varies from light pink to dark brown; variations are more prominent with lighter stains. Cherry will darken or mellow with age. This is more noticeable with light stains and usually takes place within the first six months. Sun exposure greatly accelerates this process. Mineral streaks, pitch pockets, pin knots and sap wood all occur naturally in Cherry and are acceptable characteristics.

PAINT GRADE HARDWOODS

Paint grade hardwood are used to make painted cabinetry and trim. These woods may include Soft Maple, Birch, or Beech. Typically these woods machine well and have fine grain characteristics that facilitate smooth and consistent finishes.

WHITE OAK

White Oak is found primarily in the eastern half of the United States. White Oak is noted for its density and strength and it exhibits prominent strong grain patterns typical of the Oak species. Board color ranges from light to medium tan in the heartwood and lighter brown to pale cream in the

sapwood, with occasional lighter gray shading. It is a very durable wood. One interesting characteristic of White Oak is the presence of medullary rays which produce a unique pattern and flecking. White oak logs are sometimes sawn in a special way known as "Rift Cut" which produces lumber and veneers that have very straight grain patterns and reduced presence of rays. Rift cutting increases the value of lumber and veneers which in turn are more typically utilized in producing higher end furniture and cabinetry.

BLACK WALNUT

Black Walnut grows primarily in the central and eastern regions of North America. It is highly prized as a species due to its relative scarcity and is considered to be one of the more expensive hardwoods milled in the United States and Canada. Natural Walnut heartwood ranges in color from deeper brown to light brown sapwood is usually lighter brown. The wood is dense and strong with prominent grain patterns. Walnut machines well and accepts stains and finishes nicely. It is considered a premium wood and is used to produce beautiful furniture, cabinetry and millwork.

MAPLE

Maple is a dense, fine-grained hardwood known for its strength, durability, and smooth texture. It features a consistent, light color ranging from creamy white to pale reddish-brown, often with subtle grain patterns. Its resistance to abrasion and impact makes it ideal for cabinetry and furniture applications requiring long-lasting performance and clean, contemporary appearance. Maple readily accepts a variety of finishes, including paints and stains, although it is often chosen for light or natural finishes that highlights its understated elegance

Effects Of Moisture In Wood

Under normal circumstances, all wood products contain some moisture. Wood is similar to a sponge in that it easily exchanges moisture with the environment. This is true of all wood products, even after they have been finished. Of course, a finish will slow this process, but finished wood still reacts to changes in humidity. When humidity is high, wood will absorb moisture and expand. During times of low humidity, wood will release moisture and contract. Wood will not change size or shape unless its moisture content changes due to humidity. As normal minor variations in humidity occur, the dimensional response of the wood will be imperceptible. To avoid problems, it is recommended that the relative household humidity is maintained in the 40-50% range. Humidity extremes (above 80% or below 20%) are likely to cause problems. Wood products perform best when used in a controlled environment. Problems associated with warping are usually a result of conditions on site storage, installation or use.

Points To Consider

- The density of the wood can affect how much or how little it reacts to changes in humidity. More dense species like Maple will expand or contract more than species like Cherry.
- Effects of moisture may include panel expansion or contraction, joint separation, bowing of the stile or rail and/or expansion/contraction of the stile or rail.
- Wood products located in humid climates are especially susceptible to expansion due to moisture. Product failures due to high moisture conditions are not covered under the St. Martin Cabinetry America warranty. Such locations would include waterfront properties and coastal regions.
- Regardless of location, products installed in non-air conditioned homes are especially susceptible to moisture concerns. Winter and vacation homes should maintain some form of climate control even during the off-season.
- Sometimes doors may swell and bind after installation. Upon activation of the climate control, doors should revert to their original dimension and resume normal operation. For this reason, St. Martin Cabinetry America does not recommend trimming or shaving the door edges. Trimmed doors are not covered under the St. Martin Cabinetry America warranty. Care should be taken to control humidity even during storage and installation.
- Traditional doors with 5-piece construction (stiles, rails and panels) have been engineered to allow some normal expansion and contraction of the panels.
- St. Martin Cabinetry America takes great care in selecting properly kiln dried woods to ensure stability in climate controlled homes. With proper attention to humidity levels (normal fluctuations are expected) your St. Martin Cabinetry America cabinetry will perform reliably and beautifully. Please note that the St. Martin Cabinetry America warranty does not cover product issues related to improper humidity or moisture control.

St. Martin Finish

The finish you choose for your cabinets will determine the overall atmosphere of your kitchen, and with St. Martin Cabinetry’s quality colors, wood species and door styles, you are sure to find a combination that is perfect for you. You can choose from light colored painted finishes, mid-tones, or classic dark stained finishes.

Light and mid-tone finishes accentuate the natural beauty of wood while that darker stains tend to result in a more formal rich and elegant look. Whichever finish you choose, the quality and attention to detail that St. Martin Cabinetry puts into each door will be a source of comfort for years and years to come.

STAINED FINISH

Stained Finish Doors and drawer fronts are carefully sanded to produce an exceptional surface that is ready to finish. A transparent stain is sprayed over the surface of the wood and allowed to penetrate and develop the grain. A protective, catalyzed sealer, chosen for its excellent adhesion moisture resistance and sealing qualities, is then applied and oven baked for durability. The surface is then fine-sanded by hand to develop a glass smooth surface for the topcoat. A tough, catalyzed conversion varnish topcoat is applied with airless spray and then oven-baked. This catalyzed conversion varnish finish and oven-curing system was chosen to provide an exceptional beautiful luster that is resistant to moisture and most household chemicals. This final process seals and protects your cabinetry from scratches dents and chips and provides a beautiful, smooth and durable finish.

PAINTED FINISH

St. Martin Cabinetry painted doors are hand sprayed and oven baked, layer upon layer, and hand sanded between coats to build up a hard and lustrous finish. Our painted doors are then top coated with a catalyzed conversion varnish that is very durable and protects the surface and allows for easy cleaning. Painted doors and face frames may develop hairline cracks at the joints due to moisture gain and loss causing expansion and contraction. This is considered a normal occurrence and is not viewed as a defect.

PAINTED OAK FINISH

Painted White Rift Oak are hand sprayed and oven baked, layer upon layer, and hand sanded between coats to build a hard and durable finish. Glazing or additional stain may be subsequently applied, depending on the finish followed by a catalyzed conversion varnish to protect the surface. Painted Oak doors will have additional variation door to door due to the inherent graining, inconsistency and coloring natural to the wood. Paint, glaze or stain may hangup around edges, rifts or voids found within the wood or grain.

HEIRLOOM FINISH AND GLAZING

We utilize several processes to create our beautiful heirloom finish cabinetry. The first step is to apply the color, which is done in several coats to ensure an even distribution. Next, the glaze is applied and each door is hand wiped to create highlights in the corners and seams. After sealing and fine detail sanding, we apply a catalyzed conversion topcoat to protect the finish. The result is a finish that is both durable as well as beautiful. As is the case with most handmade products, no two will look exactly alike.

LOW EMISSION PLYWOOD AND MELAMINE COATINGS

St. Martin Cabinetry uses all low emission TSCA compliant products for the highest level of customer safety. Our melamine interiors are hard, durable and washable to keep your environment clean and chemical free.

Cabinet Care And Cleaning Guide

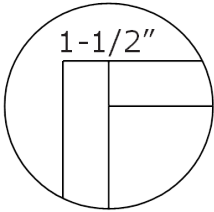

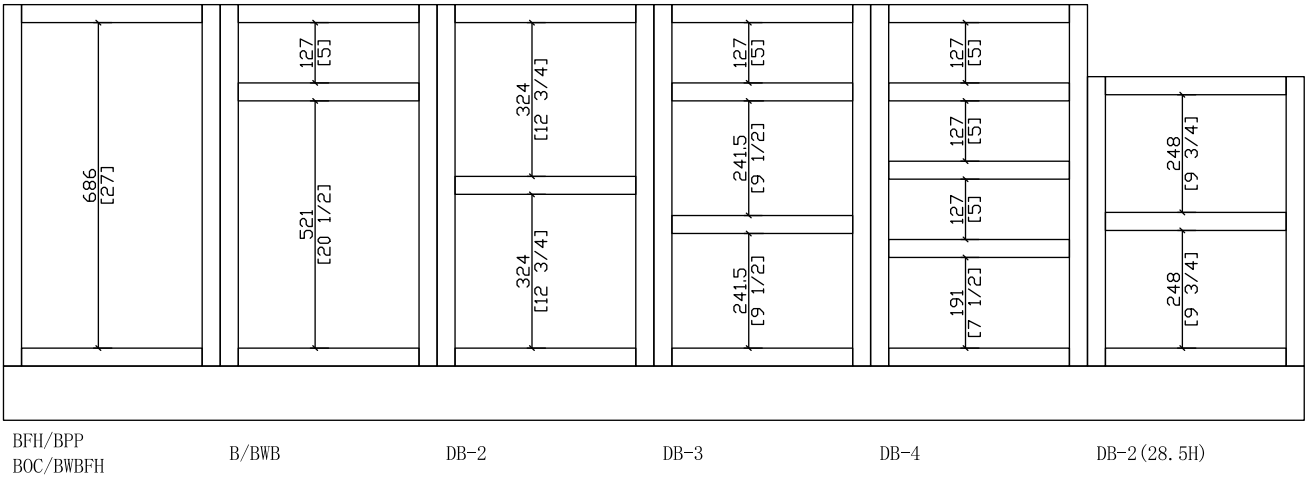

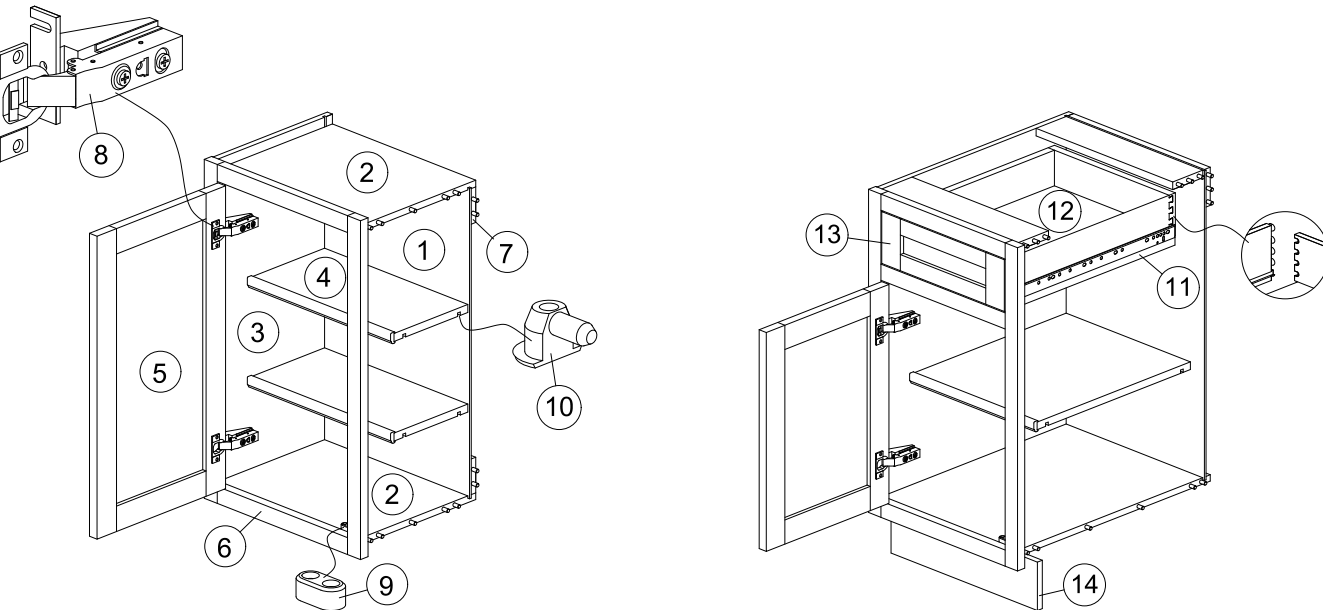

St. Martin Cabinetry has an exceptional multi-step finish and is as durable as it is beautiful! Our catalyzed conversion topcoat creates a surface that protects your cabinetry and under normal conditions requires very little maintenance. Follow these steps on basic care and you will enjoy your Moss & Grain Cabinetry for many years to come:

- 1. After installation is complete, wipe all cabinets with a damp and clean soft cloth. Dry immediately with another soft and clean cloth.
- 2. Regular cleaning requires using only a damp cloth and then drying. For tougher areas that have been affected by dirt, grease oil or other contaminants, we recommend using a damp cloth in combination with a fresh solution of mild soap. Immediately rinse with a clean and damp cloth and then dry thoroughly.
- 3. Warning: Excess moisture, which is especially prevalent near the sink, dishwasher, oven and baseboard areas, should be removed and dried immediately as it may cause warpage or other defects on your cabinetry.
- 4. Avoid using abrasive cleaners, waxes, detergents, strong soaps and basic or acidic chemicals on or near your products as they may have a deteriorating effect on the finished surface.
- 5. Avoid using a rag or dishcloth on any finished surfaces as it may contain contaminants or grease.
- 6. For minor nicks, abrasions, scuffs and scratches, we recommend using our factory supplied touch up kit.

Framed-Inset Cabinet Construction Details

- 1. Cabinet Back: The cabinet back is 1/4" plywood with a durable double sided wood grain washable melamine interior and is recessed 3/4" from the back of the cabinet.
- 2. Cabinet Floor and Ceiling: The cabinet floor and ceiling are 5/8" plywood with a durable double sided wood-grain washable melamine.
- 3. Cabinet Sides: Cabinets are 5/8" thick plywood with a durable wood-grain washable melamine. Sides are dadoed to accept the back panel for added rigidity.
- 4. Cabinet Shelves: Shelves are 3/4" thick plywood coated with a durable double sided wood-grain washable melamine. Shelves will be banded on rear and two sides with solid wood nosing applied to front edge.
- 5. Doors: 7/8" solid wood in the style and color of your choice. Please see door style section for the specific construction of your selection.

- 6. Frame: 7/8" solid wood.
- 7. I-beam Reinforced Construction: Cabinets are built with a reinforced I-beam construction to offer outstanding strength and stability for the cabinet.
- 8. Hinges: BLUM six-way adjustable clip hinges are used easing removal of the doors for installation and providing a great range of adjustment. BLUM soft-close hinges are offered standard for St. Martin cabinets. Soft close hinges are not available for diagonal wall cabinets.
- 9. Door Stopper: Each inset cabinet door features a precision stop, designed to keep doors perfectly flush with the frame.
- 10. Shelf Supports: Metal shelf clips are inserted into the sides of the cabinets and feature a locking mechanism with our plywood shelves.
- 11. Drawer Slides: The St. Martin drawer slide is a concealed, undermount, full-extension BLUM slide with a 70 lb capacity. This slide is of durable steel construction with a smooth gliding roller system and self-closing feature. Self-adjusting mounting brackets center the drawer for consistent operation. Our drawer slides also feature height adjustment tabs that allow for fine tuning the spacing of the drawer front.
- 12. Drawer Box: A St. Martin drawer box is made from 3/4" solid birch and is dovetailed at each corner. The drawer bottom is dadoed into the drawer sides and it is fully captured. The whole drawer box gets a clear UV finish.
- 13. Drawer Front: 7/8" solid wood in the style and color of your choice. Please see door style section for the specific construction of your selection.
- 14. Cabinet Toe Kick: 4-1/2" high toe space. A 5/8" thick plywood cover panel is available to match the finish of your cabinetry.

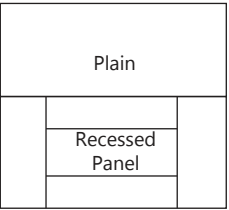

Standard cabinet face frames utilize 1-1/2" wide stiles and rails.
Note: Bases over 36" wide with doors will have a center stile

In the chart provided below, you can see the resulting drawer box height when correlated with face frame height opening

Height of drawer frame opening	Height of the drawer box
3" - 4-3/4"	2-1/4"
5" - 6-3/4"	4"
7" - 8-3/4"	6"
9" - 10-3/4"	8"
12" and above	11"

DESIGN NOTE

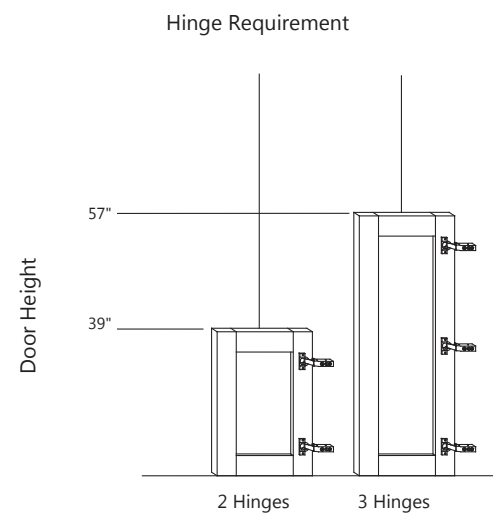

Drawer fronts that are less than 5" will automatically be reverted to a slab style drawer front

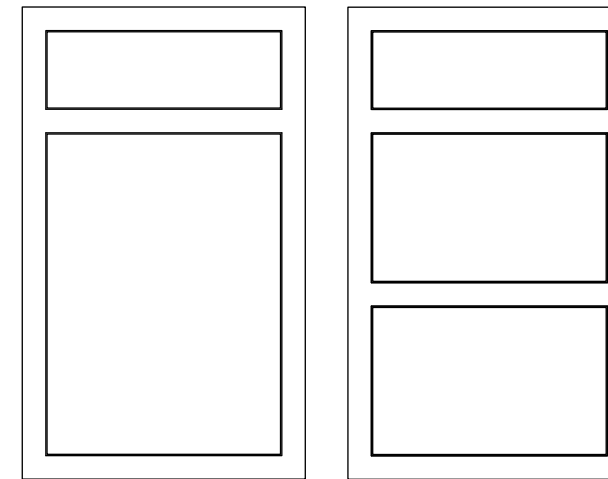

DESIGN NOTE:
4-drawer configurations do not properly align and may create design conflicts with certain drawer front styles.

HINGE SPECIFICATIONS

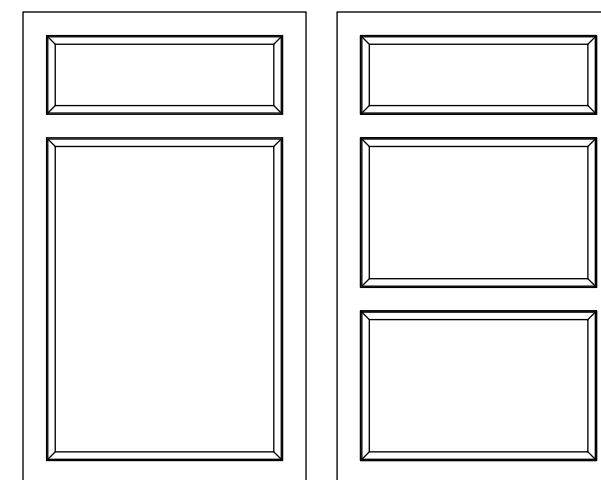

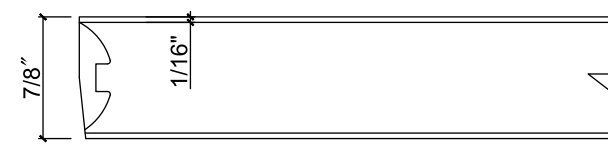

- Doors 39" in height or less are pre-drilled with two hinge holes.
- Doors 39" - 57" in height are pre-drilled with three hinge holes.
- All of our doors only feature BLUM soft close hinges

Modifications

Please note: when your order includes one of these modifications, lead times may be extended. While we will make an effort to maintain our prices and availability, they are subject to change without notice. If you have any questions, please contact our customer service department.

The fee listed next to each modification is in addition to the cabinet price.
All fees listed are shown as LIST prices.

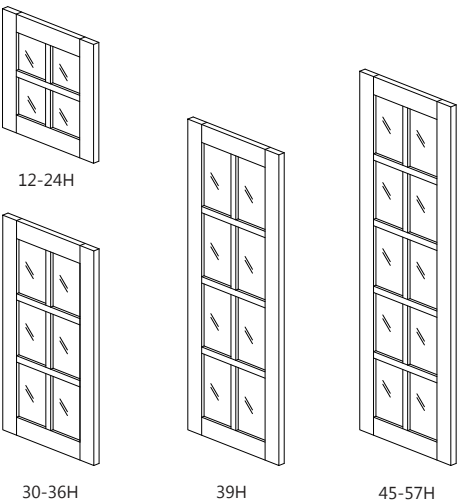

GLASS DOOR OPTIONS - PREPARE FOR GLASS DOOR (PG) (GD1)

	12"-24" H	24+" - 36" H	36+" - 42" H	42+" - 48" H	48+" - 57" H
PG-C	\$200	\$300	\$400	\$500	\$650

- Center panel will be routed out of the standard door and a glass insert will be installed.
- Doors with frame utilize soft close hinges ensure the doors can close softly.
- If you would like a finished interior for your glass cabinets, make sure to use the Finished Interior modification below.
- Price for Clear Glass included. Clear glass: PG-C.
- Fee listed is in addition to the price of the cabinet.

GLASS DOOR OPTIONS - MULLION GLASS DOOR (MGD) (GD2)

	12"-24" H	24+" - 36" H	36+" - 42" H	42+" - 48" H	48+" - 57" H
MGD-C	\$370	\$480	\$570	\$690	\$800

- Mullions are available for all door styles and the profile will match for all doors except flat panels. These will be square.
- The minimum size of a mullion glass door is 12"x12" and the mullion profile is 3/4".
- If a MGD is used, you do not need to use the PG modification.
- Price for Clear Glass included. Clear glass: MGD-C.
- Fee listed is in addition to the price of the cabinet.

12-3/4"	\$360	\$495	\$630	\$810	\$1,035

- Fee is listed in addition to the price of the drawer box.

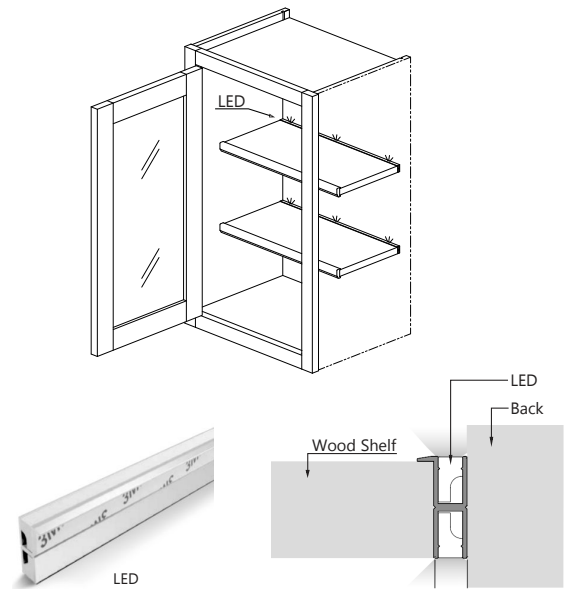

GLASS SHELVES WITH BACK SIDE LED (LED-GSB)

- LED lighting is built into the glass shelf as shown.
- One Power Supply is included with each order that includes LED lighting modifications
- Additional Power Supplies can be found in accessories section.
- One Power Supply can connect up to 6 lighting strands and can only be used in one single cabinet run.
- Shelves are not adjustable.
- Power supplies are not included and must be selected with our accessories. Please see our accessories section for available options.
- Upcharge is in addition to the base price of the cabinet.

	WALL	BASE	TALL
LED-GSB	20%	N/A	20%

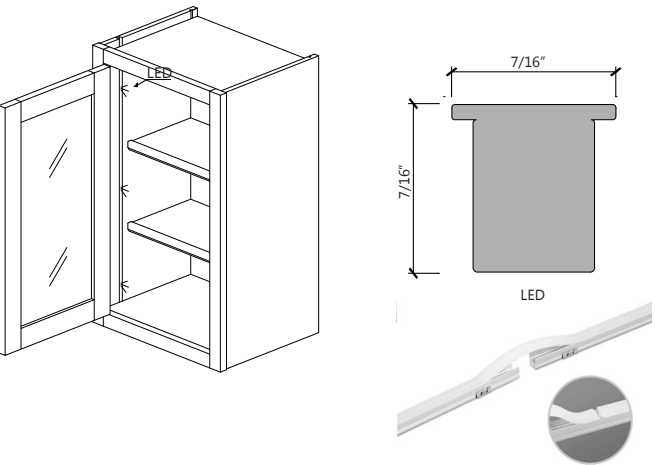

WOOD SHELVES WITH BACK SIDE LED (LED-WSB)

	WALL	BASE	TALL
LED-WSB	20%	N/A	20%

- LED lighting is built into the wood shelf as shown.
- One Power Supply is included with each order that includes LED lighting modifications
- Additional Power Supplies can be found in accessories section.
- One Power Supply can connect up to 6 lighting strands and can only be used in one single cabinet run.
- Shelves are not adjustable.
- Power supplies are not included and must be selected with our accessories. Please see our accessories section for available options.
- Upcharge is in addition to the base price of the cabinet.

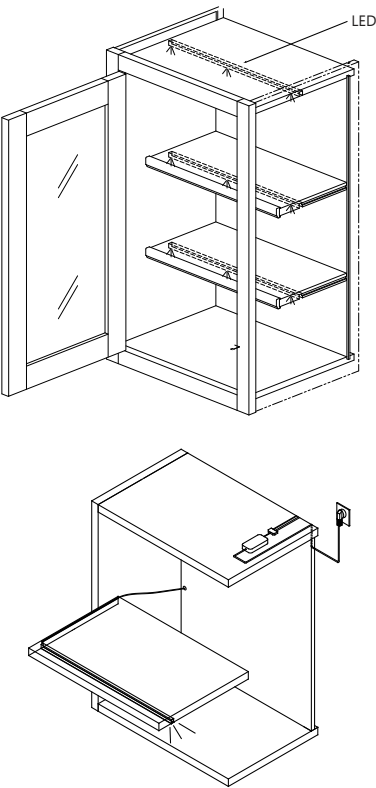

RECESSED UNIFORM LED LINEAR LIGHT (LED-REU)

	WALL	BASE	TALL
LED-REU	20%	N/A	20%

- LED lighting is built into the sides as shown.
- Shelves are adjustable.
- One Power Supply is included with each order that includes LED lighting modifications
- Additional Power Supplies can be found in accessories section.
- One Power Supply can connect up to 6 lighting strands and can only be used in one single cabinet run.
- Upcharge is in addition to the base price of the cabinet.

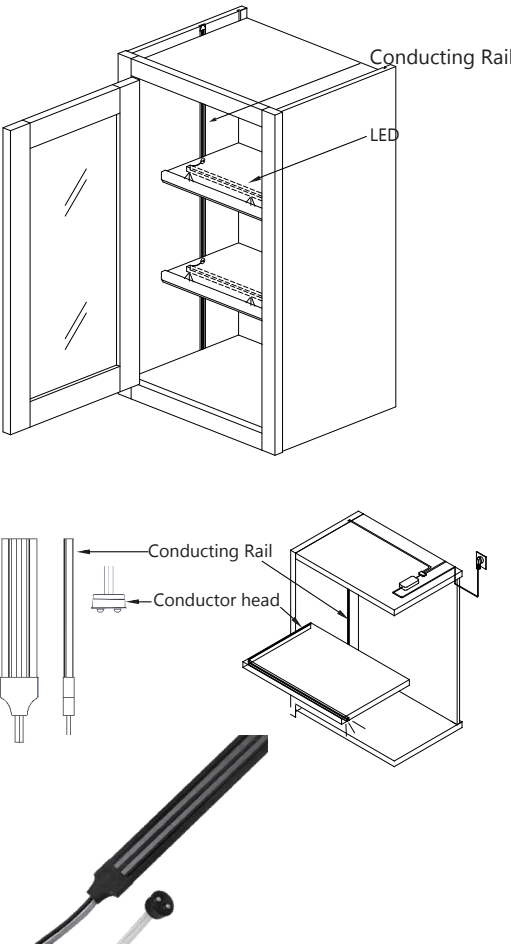

RECESSED LED UNDER SHELVES (LED-RE)

	WALL	BASE	TALL
LED-RE	20%	N/A	20%

- LED lighting is built into the wood shelves as shown.
- Shelves are not adjustable.
- One Power Supply is included with each order that includes LED lighting modifications
- Additional Power Supplies can be found in accessories section.
- One Power Supply can connect up to 6 lighting strands and can only be used in one single cabinet run.
- Upcharge is in addition to the base price of the cabinet.

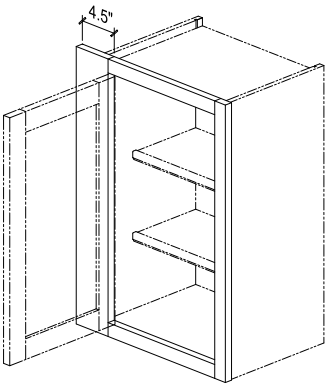

EMBEDDED CONDUCTIVE RAIL (LED-ECR)

	WALL	BASE	TALL
LED-ECR	20%	N/A	20%

- The movable layer board with LED lights can move freely through this conductive rail system.
- To install this conductive rail, vertical grooves should be cut in the side panels for embedding the electric guide rail. The conductive head and embedded wire routing should be installed on the side of the movable layer plate, as shown in the figure.
- One Power Supply is included with each order that includes LED lighting modifications
- Additional Power Supplies can be found in accessories section.
- One Power Supply can connect up to 6 lighting strands and can only be used in one single cabinet run
- Upcharge is in addition to the base price of the cabinet.

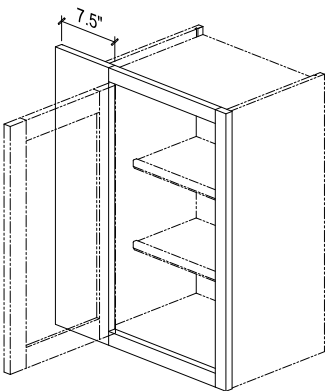

EXTENDED STILE 3" WIDE UP TO 120" HIGH (ES3)

WALL DIAGONAL & SLANT PARTITION WINE RACKS - PRODUCT INFO

WDPWR

WSPWR-L (Left)

WSPWR-R (Right)

- For open cabinets only.
- Cabinet will automatically come with matching finished interior and exterior.
- Custom quote is required.

Wall Cabinets

READING THE CODE W301224 W (wall) 30 (width) 12 (height) 24 (depth)

Standard wall cabinet depth is 14" deep which includes door frame.

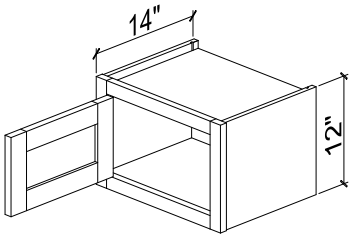

You must specify how you would like us to finish your exposed ends.

We offer two solutions to finish exposed ends: veneer finished ends that are factory applied and lock miter applied ends. Both options are factory applied.

The cost for wall veneered finished ends can be found in the Modifications section.

Wall Hoods

READING THE CODE WH4824 WH(wall hood) 48 (width) 24 (height)

- Hood should be set a minimum of 30" above the cooking surface.
- Wall connected hoods feature a wood and veneer construction.
- Metal hoods featured in this section come equipped with a blower and lighting insert included. See individual product descriptions for details
- Hoods can be either independent of the cabinet run or integrated into the cabinet run.
- Dealer is responsible for ensuring that hoods purchased meet local building codes and that the hood is securely installed.

Base Cabinets

READING THE CODE B (base) 30 (width)

- Standard base cabinet depth is 24" unless stated otherwise, which includes the frame and face.
Standard base cabinet height is 34-1/2" unless stated otherwise.
- We offer two solutions to finish exposed ends: veneer finished ends that are factory applied and lock miter applied ends. Both options are factory applied.
- The cost for finished sides can be found in the Modifications section.

- Unit is designed for use between two base, desk or tall cabinets.
- Drawer box is 3" tall.

Tall Cabinets

READING THE CODE PC308414 PC (pantry) 30 (width) 84 (height) 14 (depth)

- Standard cabinet depth is 24" unless stated otherwise, which includes the frame and face.
- We offer two solutions to finish exposed ends: veneer finished ends that are factory applied and lock miter applied ends. Both options are factory applied.
- The cost for finished sides can be found in the Modifications section.

The floating shelves are available with the following options:

- The top and bottom shelf is produced by 3/8" Al MDF core veneer with matching 3/4" solid wood trim on three sides.
- Standard height or thickness of shelf unit is 2 1/2".

Support Frame:

- Mounting brackets are metal.
- All floating shelves should be mounted to a minimum of two studs for shelves under 50" wide and three or more for over. We recommend high quality coarse thread screws at least 2 1/2" in total length with at least two screws per stud.
- After complete installation, it is recommended that the shelf be secured to the support frame using finishing nails or pins to prevent the shelf from sliding off the support.
- Installation brackets are included.

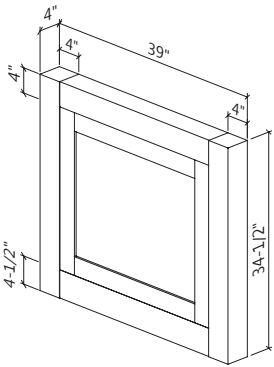

WOOD COUNTERTOP

ITEM	CH	WO	WT
WCT	\$200/SF	\$284/SF	\$350/SF

- The finish options for our countertops are Cherry Wood, White Oak, and Walnut.
